

The Healing Practices Of The Knights Templar And Hospitaller: Plants Charms And Amulets Of The Healers Of The Crusades

The Knights Templar and Hospitaller were two of the most powerful and influential orders of the Middle Ages. They were both founded in the 12th century, and their primary mission was to protect pilgrims travelling to the Holy Land. However, they also played a significant role in the development of medicine and healthcare.

The Templars and Hospitallers were both skilled in the art of healing, and they established a number of hospitals and infirmaries throughout Europe. These hospitals provided care for the sick and injured, and they also served as teaching centres for medical students.

The Templars and Hospitallers were also responsible for the development of a number of new medical technologies. For example, they were the first to use surgery to treat wounds, and they also developed a number of new surgical instruments.
